RE: U.S. Oil Recovery, L.P., Pasadena, Harris County, Texas (the "Site"); SSID No.  
A6X7; CERCLA § 104(e) Requests

Dear Ms. Brown:

This letter and related attachments constitute the response of CenterPoint Pipeline Services, Inc. ("Respondent") to the referenced CERCLA § 104(e) requests (the "Requests"). The Requests were incorrectly addressed to CenterPoint Energy, Inc. The correct entity is Respondent, which is a subsidiary of CenterPoint Energy Resources Corp. CenterPoint Energy Resources Corp. is a subsidiary of UtilityHolding, LLC, and UtilityHolding, LLC is a subsidiary of the incorrectly addressed entity, CenterPoint Energy, Inc.

During 2005, Respondent contracted to perform fuel system maintenance, including the removal of non-hazardous fuel oil tank bottoms and related pipeline wastes, at the Greens Bayou (Houston, Texas) and Cedar Bayou (Baytown, Texas) power plants owned by Texas Genco, LP (an indirect subsidiary of NRG Energy, Inc.) (hereinafter referred to as "Texas Genco"). The plants were previously owned and operated by Reliant Energy HL&P, which itself was earlier known as Houston Lighting & Power Co. Respondent subcontracted with USA Environment, LP to remove and transport the waste from the power plants to an approved facility. USA Environment, LP arranged to send the waste to U.S. Oil Recovery, and performed, at least in part, through its affiliated entity, Bayou City Environmental Services.

It is Respondent's intention to be fully responsive to the Requests, although the company expressly reserves its right to supplement and/or amend its responses at a later date should additional information become available. In accordance with the instructions included with the Requests, Respondent has also provided documents that were consulted or relied on to provide these responses, and those documents are included and attached hereto.

Page | 2

For ease of reference, each individual Request is repeated with Respondent's response to that Request shown beneath.

Sincerely,

CRAIN, CATON & JAMES, P.C.

## **RESPONSES TO EPA's CERCLA § 104(e) REQUESTS**

1. What waste did you ship to the USOR facility?

**RESPONSE:** Respondent, formerly known as Reliant Energy Pipeline Services, contracted with Texas Genco to service the Fuel Oil Systems at the Greens Bayou and Cedar Bayou power plants by removing water and non-hazardous fuel oil tank sludge. Respondent subcontracted with USA Environment, LP to remove and transport the waste to an approved facility. USA Environment, LP chose U.S. Oil Recovery and made the arrangements to ship the wastes there. Respondent properly characterized the wastes sent to the Site as Class I non-hazardous waste pursuant to TCEQ regulations. In responding to Request No. 1, Respondent relied on available manifests and business records, including its contract with Texas Genco and its contract and invoices with USA Environment, LP (relevant copies enclosed).

2. Did any of the waste that you shipped to the USOR facility contain a listed hazardous substance as defined under CERCLA or RCRA? If so, provide the listed hazardous substance name(s) or RCRA waste number(s).

**RESPONSE:** It is believed that no listed or characteristic hazardous wastes, as defined those terms are defined in RCRA, were sent to the Site by Respondent. We have no data to know whether the tank bottoms in question contained hazardous substances as that term is defined under CERCLA, but would note the possible applicability of CERCLA's petroleum exclusion. In responding to Request No. 2, Respondent relied on available manifests.

3. What chemicals were used in the business/industrial process that created the waste stream?

**RESPONSE:** The waste stream was generated from transportation, storage and use of fuel oil at the power plants. In responding to Request No. 3, Respondent relied on the enclosed manifests and its contract with Texas Genco (relevant portion enclosed).

4. What process created the waste stream?

**RESPONSE:** The waste was generated from fuel oil tanks and pipelines servicing electric generating plants. In responding to Request No. 4, Respondent relied on its corporate knowledge and the Texas Genco contract.

5. What was the total quantity of each waste stream that you sent to USOR?

**RESPONSE:** The USOR PRP Group is currently allocating volumetric quantities for group members. This is an ongoing process and therefore it is difficult to determine the exact quantity that each group member sent to the Site. Currently, it is believed that approximately 311,700 gallons were transported to the Site from the Texas Genco Cedar Bayou power plant, and 68,500 gallons were sent to the Site from the Texas Genco Greens Bayou power plant. A combined total of 380,200 gallons was thus sent from both facilities. Manifest records to support these

allocations are enclosed. In responding to Request No. 5, Respondent relied on the enclosed manifests.

6. Please provide a waste profile for each hazardous waste or Class I waste stream.

**RESPONSE:** Any available "waste profile" would have to be obtained from USA Environment, LP. None was accomplished by Respondent, and none is present in Respondent's corporate records.

7. Provide all waste codes for each waste stream.

**RESPONSE:** Texas waste code 0104-603-1 appears on the manifests. In responding to Request No. 7, Respondent relied on the manifest records.

8. Did any of the chemicals used in the business/industrial process contain any of the following hazardous substances: arsenic, barium, cadmium, chromium, lead, mercury, selenium, silver, benzene, chloroform, 1,2-dichloroethane, methyl ethyl ketone, tetrachloroethylene, trichloroethylene, acetone, or hydrogen sulfide? If so, please identify which hazardous substance(s) was/were used. Also, please provide copies of any documents listing such hazardous substance(s) and how it and/or the chemical(s) were used in the operations at the Site, the purpose for such hazardous substance(s) and/or chemical(s) and how or if such hazardous substance(s) and/or chemical(s) were disposed of.

**RESPONSE:** The business/industrial process generating the waste was electric power generation. Respondent acted solely as a contractor to clean out fuel oil tanks and pipelines serving the plant. EPA would need to contact the corporate successor to Texas Genco (NRG), now GenOn Energy, Inc., to find out whether any of the listed hazardous substances were used in plant operations. However, because the waste was derived solely from fuel oil transportation and storage, it is not believed that any chemicals used elsewhere in the power plant operations would have been present in the shipments to U.S. Oil Recovery. In responding to Request No. 8, Respondent relied on its corporate knowledge, the contract with Texas Genco and waste manifests.

9. Did any of the chemicals used in the business/industrial process contain any other hazardous substances not listed above in Question 8? If so, please identify the hazardous substance(s) used. Also, please provide copies of any documents listing such hazardous substance(s) and how it and/or the chemical(s) were used in the operations at the Site, the purpose for such hazardous substance(s) and/or chemical(s) and how or if such hazardous substance(s) and/or chemical(s) were disposed of.

**RESPONSE:** See response to Request No. 8.

## 1.0 SYSTEM DESCRIPTION

### 1.1 PIPELINE ROUTE

- The Fuel Oil and Gas Pipeline System includes the following pipeline segments:

S. R. Bertron to Exxon and Cedar Bayou  
S. R. Bertron to Texas Eastern  
Texas Eastern to Webster and P. H. Robinson  
S. R. Bertron to Oil Tanking  
Oil Tanking to GATX  
GATX to Amerada Hess  
Amerada Hess to Greens Bayou  
Greens Bayou to T. H. Wharton  
Williams /Kinder Morgan to North Dayton Gas Storage

Drawings SK-100 and SK-200 in Appendix A show the route of the Fuel Oil and Natural Gas Pipeline and the location of each pipeline station.

Drawing SK-300, Sheets 1 – 11 in Appendix A show the physical location of each pipeline station.

Drawing E-855-7000-T in Appendix A is the flow diagram for the Fuel Oil and Gas Pipeline System.

### 1.2 Pipeline Pumping Stations

#### 1.2.1 S. R. Bertron Plant

Barge unloading dock, barge unloading meters, storage tank fill valves, pipeline booster pumps, pipeline mainline pumps, pipeline heating and fuel system, pipeline meters, electrical supply system, scraper traps, pipeline strainers, oil collection sump system, oil/gas slug catcher and separators, all necessary piping, valves, and instrumentation.

Drawings E-855-7110-A-D in Appendix B are the flow diagrams for the S. R. Bertron Plant Fuel Oil System.

#### 1.2.2 Greens Bayou Plant

Scraper traps, pipeline strainers, pipeline meters, pipeline mainline pumps, truck unloading pumps, electrical supply

## 1.5 PLANT FUEL OIL SYSTEM

The following describes the location of all equipment which comprise the Plant Fuel Oil Storage System:

### 1.5.1 S. R. Bertron Plant

The S. R. Bertron Plant Fuel Oil System comprises all facilities for storage, recirculating, heating, and intra-plant transfer of fuel oil from the Fuel Oil and Gas Pipeline System inlet valves on storage tanks 1 thru 6 to the outlet of valve LVP7. The equipment includes the storage tanks, tank valves, lines, drains, all oil-water separator systems, power sources, all necessary piping, valves, and instrumentation.

Included in this system is a United States Coast Guard approved Barge Load/Unloading Dock Facility complete, with unloading arm, piping, valves and dock house.

Drawings E-855-7110-A through D in Appendix B are the flow diagrams for the S. R. Bertron Plant Fuel Oil Supply System.

### 1.5.2 Greens Bayou Plant

The Greens Bayou Plant Fuel Oil System comprises all facilities for storage and intra-plant transfer of fuel oil from the Fuel Oil and Gas Pipeline System inlet valves to storage tanks 1 through 7. The equipment in the Plant Fuel Oil Storage System includes storage tanks 1 through 7, tank valves, lines, transfer pumps, power sources, all necessary piping, valves, and instrumentation.

Excluded from the Plant Fuel Oil System are the north tank farm forwarding pumps, oil return systems, API separator pit and associated oil-water tricellerator, transfer stations "A" and "B", rail unloading station and all associated piping and equipment.

Drawings E-855-8000-T & A in Appendix B are the flow diagrams for the Greens Bayou Plant Fuel Oil Supply System.

### 1.5.3 T. H. Wharton Plant

The T. H. Wharton Plant Fuel Oil System comprises all facilities for storage and transfer of fuel oil from the Fuel Oil and Gas Pipeline system inlet valves to storage tanks 1 thru 6. The equipment includes the storage tanks, tank valves, lines, transfer pumps, dike drains, oil-water systems, power sources, all necessary piping valves, and instrumentation.

Excluded from the Plant Fuel Oil Storage System are the south tank farm transfer pumps, regulator and re-circulation systems, and discharge piping to No. 2 unit, API separator pit and associated oil-water tricellerator.

Drawing E-855-8200-A in Appendix B is the flow diagram for the T. H. Wharton Fuel Oil Supply System.

### 1.5.4 Cedar Bayou Plant

The Cedar Bayou Fuel Oil Storage System comprises all facilities for storage and transfer of fuel oil from the Fuel Oil and Gas Pipeline System to the inlet valves of tank numbers 1 through 6 to the Plant accumulator tanks. The equipment includes the storage tanks, tank valves, lines, transfer pumps, dike drains, oil-water sump systems, power sources, all necessary piping, valves, and instrumentation.

Excluded from the Plant Fuel Oil Storage System are the API separator pit and the associated oil-water tricellerator and air compressors.

Drawing E-855-7550-A&B in Appendix B is the flow diagram for the Cedar Bayou Fuel Oil Supply System.

### 1.5.5 P. H. Robinson Plant

The P. H. Robinson Plant Fuel Oil system comprises all facilities for transfer of fuel oil from the inlet valves of the Fuel Oil and Gas Pipeline System to the station fence on the pipeline to the Plant accumulator tank. The storage tank has been dismantled. The equipment includes lines, re-circulation pumps, transfer pumps, dike drains, power sources, all necessary piping, valves and instrumentation.

2.6.22 Provide telephone service for the Pipeline Office and Warehouse at S. R. Bertron. The telephone hardware system is provided by OWNER.

2.6.23 Contract for the Fuel Oil and Gas Pipeline System's continued membership in the Texas One Call System.

2.6.24 Provide any computing equipment required by Contractor's staff at the Pipeline Office at S. R. Bertron.

## 2.7 Plant Fuel Oil Storage System

The Contractor shall provide the following:

2.7.1 Coordinate efforts to contain oil spills and efforts to restore spill sites to their condition. The Contractor shall at all times have at his disposal the means to carry out such a plan. This shall include personnel trained to the "Hazardous Materials Technician" level as per 10 CFR Part 1910. Contractor shall notify OWNER of any oil spill.

2.7.2 Be fully responsible for the proper training of any required manpower. In order to accomplish this task, the Contractor shall use the OWNER approved operations procedure manuals to instruct employees in the proper use of all Plant Fuel Oil Storage System equipment.

2.7.3 Schedule and perform all periodic maintenance on Plant Fuel Oil Storage System equipment in accordance with the OWNER preventative maintenance program described in Appendix C. The Contractor shall maintain all records required by the Preventative Maintenance Program.

2.7.4 The Contractor shall maintain a staff of personnel dedicated to the Work adequate to perform all preventative maintenance activities as required by the program.

2.7.5 Execute all operations orders given by the OWNER.

2.7.6 Provide operational manpower at any and all Plant Fuel Oil Storage System facilities for intra-plant fuel oil transfers, tank gauging, and other routine tank farm activities. All operations personnel shall have documented training showing they are properly trained to perform all their required duties.

SUPPLEMENT #3  
February 20, 2004

This change order is issued to incorporate the following changes:

1. Increase the Payroll Burden rate by 5% effective January 1, 2004 from 51% to 56%.
2. Authorize the burden reimbursement request at a rate of 54% or \$34,548.00 for expenses during 2003. This is a one time true up request that was approved based on justification.
3. Update Exhibit C as attached.
4. Update Exhibit D - Schedule of Travel Allowances to reflect the following modifications:

The personal mileage reimbursement rate will be changed to the current IRS Allowable rate.

Contractor will be reimbursed for out of town travel cost of dedicated personnel for training, or for purposes benefiting the contract, as directed by Owner at a rate of not to exceed \$150.00 per day plus actual transportation charges. Contractor must exercise reasonable and prudent judgement of expenditures and all lodging and meal charges must be validated by receipt.

All other pricing, terms and conditions of the original agreement remain unchanged

September 2, 2003

This Change order is issued to incorporate the following changes:

1. Change Contractor's name to CenterPoint Energy Pipeline Services.
2. Under Attachment 2 Scope of Work, Section 1.3 Pipeline Injection Stations, of the existing operations and maintenance contract between Texas Genco and CenterPoint Energy Pipeline Services, the following language is added to the contract to incorporate the Cokinos acquisition;

1.3.8 Cokinos System - ANSI 600 natural gas pipeline system consisting of approximately 2.7 miles of 16" pipeline, 350 MMSCFD meter station located at the Florida Gas Transmission (FGT) tie-in, just south of Dickinson Bayou and approximately one mile west of Hwy. 146, and 150 MMSCFD and 350 MMSCFD meter stations located at the PH Robinson power generating plant. The pipeline system and metering is designed to transport natural gas from FGT's 22" pipeline to the PH Robinson power generating plant for fuel gas and to transfer gas to and from the Texas Genco Fuel Oil Pipeline (FOPL) system. The pipeline system has a bi-directional design that allows for gas from the Texas Genco FOPL system to be transported to the FGT 22" pipeline. All metering on this system is bi-directional.

Specific information for this system including drawings, certifications, equipment data, etc. is contained in a two volume, three-ring binder Project Data Book located at the SR Bertron Pipeline office.

All other pricing, terms and conditions of the original Agreement remain unchanged.

\*\*\*\*\*  
\*\*\*\*\*

SUPPLEMENT #1  
August 28, 2002

This change order is issued to incorporate rates for the following equipment in addition to Exhibit C:

1. Desktops - Compaq EVO Series D500(or similiar) -\$50.00 per month (each).
2. Notebooks - Compaq EVO N1000v(or similiar) -\$75.00 per month (each).

### SUPPLEMENT #5

December 8, 2004

This change order is issued to incorporate the following change(s):

1. Authorize Contractor to use space in Owner's Pipeline facility to allow Contractor to monitor other client's facilities from a central location. When Contractor is using Owner's facility to monitor other client's assets a deduction will appear on Owner's monthly invoices of \$1,000.00.
2. Establish that when Contractor is monitoring other client's assets from Owner's facility, Owner will only be charged for actual time used to monitor Owner's assets. Any time used to monitor other clients assets will not be billed to Owner.
3. Establish Owner's Invoicing address as:

Texas Genco, LP  
12301 Kurland Drive  
Houston, TX 77034  
Attn: Emily K. McKay

All other pricing, terms and conditions of the original Contract remain unchanged.

Valid End: 12/01/2005

Freight Terms: Not Applicable  
Payment Terms: Payment Due Net 30 Days  
Target Value: 12,000,000.00 USD

Supplement #6  
March 31, 2005

This change order is issued for the following:

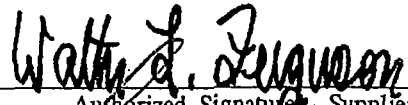

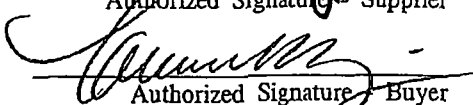

- 1) Extend the Contract term to 12/1/2005 - to be renewed monthly from 4/1/2005 - to allow for the completion of separation activities;
- 2) Update Exhibit A to reflect the following:
  - a) increase the annual salary of the Manager of Operations from \$80,000 to \$110,000
  - b) change the title of O&M Specialist to O&M Leader
  - c) change the title of Manager of Operations to Director of Operations
  - d) modify the contract to state that Dedicated Salaried Personnel will be billed to the contract as dedicated to the system. Time spent by a Dedicated Salaried Personnel away from the system on other projects/contracts for more than one full day or days will not be charged to the contract. It is understood that Dedicated Salaried Personnel are consider .on call. and available to represent the contract 7 days a week, and 24 hours a day;
- 3) Update Exhibit C to reflect the following:
  - a) increast the mileage charge on dedicated vehicles by \$0.15 due to the dramatic increast in the cost of fuel
- 4) Modify 14.10 to reflect the following:
  - a) increase the management fee from 12% to 15%
  - b) increast the mark-up on subcontracted services from 8% to 10%.

All other Pricing and Terms & Conditions of the original Contract remain unchanged and in full force and effect.

### Other Instructions:

- The Contract number must be shown on all invoices, shipping papers, packages, and correspondence pertaining to order.
- Invoice must separate materials from labor/services and must include make, model, and serial number of all installed equipment.

THIS ORDER IS PLACED SUBJECT TO CONDITIONS ATTACHED.

  
Authorized Signature - Supplier
